

CARVER Bar Clamp C301187

Standard-duty long-reach bar clamp for engineering workholding. The reversible-jaw arrangement supports spreading, and the spring-loaded jaw retains its position after pressure is released.

Manufacturer part C301187 | Model T321-24 | Alternative model T321-600

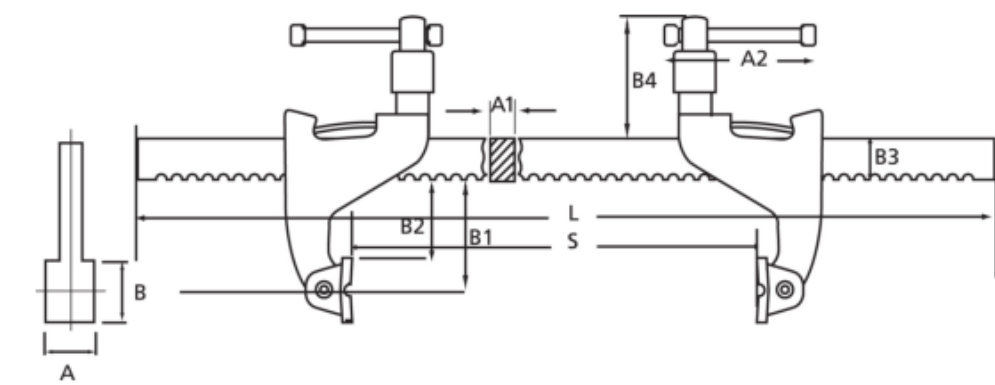

Manufacturer standard-duty long-reach series illustration; dimensions below apply to the selected part.

Selected configuration

Opening S (mm)	Reach B1 (mm)	Clamping force (daN)	Mass (kg)
600	120	565	3.5

Workholding clamp. Clamping force is not a lifting capacity or working load limit. Select by clamp type and manufacturer part number; the T321-24 and T321-600 aliases are shared by different clamp types.

Manufacturer dimensional key

Source drawing, unchanged. All table dimensions are in mm; drawing not to scale.

A	A1	A2	B	B2	B3	B4	L
25	12	76	32	104	30	76	710

Selection and quotation

Specify clamp type, manufacturer part number and quantity (each). Include the required opening/reach, workpiece material and application. Confirm documentation and availability with the quotation. Follow the instructions supplied with the clamp.

Technical basis: CARVER Product Brochure 09.18, PDF page 7, selected T321-24 row; corroborated by the manufacturer Bar Clamp data sheet.
Manufacturer: Carver & Co. (Engineers) Ltd. No product certification claim is made.
